Professional Summary

Aspiring Product/Project Management Intern with a strong foundation in user-centric problem solving, data analysis, and workflow design. Experienced in building AI and CRM-based solutions with a focus on improving user journeys, optimizing funnels, and driving product decisions through insights. Skilled in cross-functional collaboration and translating user needs into scalable product solutions.

Education

VIT Bhopal University June 2022 pursuing
BTech in CSE(AIML) ***8.81 CGPA***

Skills

Expertise: Product Requirement Documentation (PRD), User Story Writing, Feature Prioritization (MoSCoW), Product Lifecycle Understanding, User Journey Mapping, KPI Tracking, A/B Testing Basics, Requirement Gathering, Stakeholder Management, Cross-Functional Coordination

Languages: Data Interpretation for Product Decisions, Insight Generation, Funnel Analysis, Structured Problem Solving, Root Cause Analysis, Logical Reasoning, Hypothesis Testing, Decision Support

Frameworks: Customer Journey Mapping, Lead Management & Lifecycle Tracking, Workflow Design, SaaS Business Understanding, Product Metrics Analysis, Conversion Optimization Thinking

Tools: Excel (Advanced – Pivot Tables, VLOOKUP, Data Cleaning), Google Sheets, Dashboard Reporting, Data Visualization, Documentation, Presentation Tools, Collaboration Platforms, Cloud-Based Tools Awareness

Professional: Strong Verbal & Written Communication, Analytical Thinking, Stakeholder Coordination, Team Collaboration, Time Management, Adaptability, Learning Agility, Problem Ownership

Projects

AI-Powered Conversational Chatbot

Product Design — Conversational AI — User Experience

- Identified key user pain points and designed structured conversation flows, improving response efficiency and reducing manual query handling.
- Translated 1000+ customer queries into automated workflows, enabling scalable engagement and better user experience.

CRM-Based Lead Management & Sales Insights System

Sheets, Data Analysis, Data Visualization, Funnel Analysis, Workflow Design, Lead Lifecycle Management

- Designed a lead lifecycle tracking system and analyzed funnel drop-offs, identifying key stages for improving conversion rates.
- Processed and visualized 2000+ data entries to generate actionable insights and dashboards for product decision-making.

WhatsApp Chat Analyzer - Business Insights Project

Customer Interaction Analysis, Data Reporting, Visualization-Based Insights, Product Metrics Understanding (GitHub)

- Analyzed 5000+ user messages to identify engagement patterns, retention signals, and behavioral trends.
- Built structured dashboards to convert raw data into actionable insights, supporting feature improvements and user experience optimization.

Experience

TEACHNOOK ROBOTICS Feb 2023 – May 2023
Robotics Intern *Remote*

- Collaborated with cross-functional teams to gather requirements and translate them into structured project workflows.

Certifications & Achievements

- Solved 550+ coding problems across multiple platforms (Link)
- AWS Certified Cloud Practitioner (Link)
