Projects

CRM-Based Lead Management & Sales Insights System

Product Analytics — Growth — Funnel Optimization

- Designed an end-to-end lead lifecycle tracking system to monitor user movement across the sales funnel.
- Conducted funnel analysis to identify drop-off points and proposed data-driven improvements to increase conversion rates.

AI-Powered Conversational Chatbot

Product Design — Conversational AI — User Experience (GitHub)

- Identified user pain points and designed structured conversation flows to improve support efficiency and reduce response time.
- Translated business requirements into scalable chatbot workflows, enhancing user experience and automation.

WhatsApp Chat Analyzer – Business Insights Project

Product Analytics — User Behavior — Data Insights (GitHub)

- Analyzed user interaction data to identify engagement patterns, retention signals, and behavioral trends.
- Analyzed user interaction data to identify engagement patterns, retention signals, and behavioral trends.

Experience

TEACHNOOK ROBOTICS Feb 2023 – May 2023

Robotics Intern

- Designed and simulated robotic components using TinkerCad and worked with sensors and motors for basic automation projects.

Certifications & Achievements

- Solved 550+ coding problems across multiple platforms (Link)
- AWS Certified Cloud Practitioner (Link)
- Privacy and Security in Online Social Media (NPTEL) (Link)
- GEN AI Using IBM Watsonx (Link)
